

Data Sheet

Smart Wall Corner Beads – SWCB 50

Description

It eliminates the need for the time consuming task of rasping and double wrapping of corners to achieve a smooth, plumb, and level corners. The nose allows for straight corners, depth of finish and high impact resistant. The absence of a rounded nose allows the EIFS corner bead to lie perfectly flat on the two adjoining walls that form the corner.

All exterior accessories shall conform to ASTM standards D1784, C1063, and D4216. They shall be used where specified by the architect and installed per industry standards.

Technical Data

Packing	200 pieces / carton
Colour	White
Size	2.5 inches x 2.5 inches Length – 10 feet
Insulation thickness	2 inches
